Tender text: Multivert MVI 7001 (3~400 V, EPDM,)

Multistage, non self-priming, vertical high-pressure centrifugal pump in in-line design.

The pump shaft and the motor shaft of the IEC standard motor are connected by means of a clamp coupling. A separate lantern roller bearing ensures optimum admission of axial thrusts. Intermediate bearings in the hydraulics guarantee a long service life.

The pump is suitable for water supply, water distribution and pressure boosting, industrial recirculation systems, process water and cooling water circulation systems. It can also be used in fire extinguishing systems, washing systems as well as for irrigation.

Special features/product advantages

- Corrosion-resistant impellers, guide vane apparatuses and stage housings
- Drinking water approval for pumps with parts that come in contact with the fluid made of stainless steel (EPDM version)

Scope of delivery

- Wilo-Multivert MVI high-pressure multistage centrifugal pump
- Installation and operating instructions
- Counter flanges made of stainless steel of cast iron with the corresponding screws, nuts and gaskets for PN16 pump version with oval flanges

Design notes

- Motor protection is to be provided on request or onsite.
- Single-phase AC motor equipped with built-in thermal motor protection and capacitor
- The spacer coupling (from ≥ 15 kW) allows the mechanical seal to be replaced without removing the motor
- Counter flanges are available as accessories.
- Bypass sets are available as accessories.
